DETAILED ACTION

Applicant filed a response to the Non-Final Action of November 16, 2009 on April 16, 2010.

Claims 3, 4, 7-11 are cancelled. Claims 1, 2, 5, 6, 12 are amended.

Claims 1, 2, 5, 6, 12-19, drawn to a transgenic mouse comprising mouse GNAP, are under consideration.

The Examiner left a voicemail message on June 28, 2010 for Mr. Gerald Murphy to suggest claim amendments to put the case in condition for allowance. On July 1, 2010, the Examiner left a voicemail message for Mr. Murphy on July 1, 2010, indicating that if no response was received regarding the proposed amendments by the close of business that day, the Examiner would send an Office Action. No response was received from Mr. Murphy.

Maintained Rejection

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 2, 5, 6, 12-19 remain rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for

a transgenic mouse, or a progeny thereof, comprising a transferred recombinant mouse GANP gene that encodes and expresses a protein of SEQ ID NO. 2, wherein said transgenic mouse produces high affinity antibody-producing B cells,

does not reasonably provide enablement for

any transgenic non-human mammal other than mouse comprising a mouse or human GANP gene, wherein said mammal produces high affinity antibody-producing B cells.

The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims, for reasons of record October 11, 2007, July 28, 2008, January 21, 2009, November 16, 2010.

Applicant's arguments filed April 16, 2010 have been fully considered and they are not persuasive.

Applicant indicates that the claims have been limited to specify mice. As such, the rejection is overcome (Applicant's response, page 5). In response, this is not persuasive. As indicated above, the art and specification provide guidance for using a mouse protein (SEQ ID NO. 2) in a mouse, but does not provide guidance for using a human protein (SEQ ID NO. 4) in mouse. As such, the claims remain rejected.

Conclusion

No claims allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
